

Small
(1-2 weeks)

- Hypothesis is complete
- User research not needed, or existing research is available
- Measurement plan is clear
- Updates to documentation might be needed
- Existing components and patterns will be used
- Mock-ups potentially needed
- No prototype, or light prototyping required
- Low stakeholder involvement
- Design leadership does not need to review

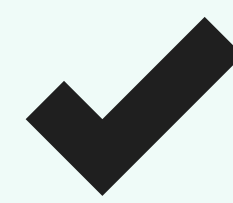

Medium
(3-4 weeks)
All of the Small requirements+

- Discovery Plan
- Design pattern evolution
- User Flow
- New prototype (local interaction change)
- Wireframing
- A/B testing
- User Testing (hypothesis is high level but needs to be de-risked)
- Engagement with Shared Services
- Surveys
- Stakeholder inform (Director)
- Interviews
- Design Leadership Review
- Jobs to be Done
- Senior Design Manager approval
- Painpoint Analysis
- User Story Map

Large
(5-8 weeks)
All of the Medium requirements+

- Evaluative Research
- Concept Poster
- Can be broken down into 2-3 Smalls
- Journey Map
- Designing for the future
- Champion/Challenger testing
- New pattern design
- Stakeholder Mapping
- New prototype with E2E flow
- Engagement with Shared Services
- Data Mapping
- Design Leadership Review
- Information Architecture
- Group Design Manager approval
- Usability Testing
- Stakeholder Involvement (GVP)
- Competitive analysis (user or market landscape exploration)

Extra Large
(9+ weeks)
Director-assigned work

- Visioning workshop
- Initial vision prototyping
- Vision documentation
- Design for buy-in strategy
- Generative research
- Service design & data mapping
- Rough and Ready Prototyping (lo-fi make to learn research)
- Object Oriented Design (Data-Focused Generative Design)
- User & market landscape exploration
- Gigamap
- Problem framing
- Service bluepring
- Persona & archetype creation
- Ecosystem Map
- Feasibility & risk assessment
- Dependency Map
- Brainstorm session
- Multiple Domain involvement (E2E)
- Stakeholder interviews/alignment
- Leadership review up to C-Suite
- Contextual inquiry
- Case Study
